8. How did the class size (35 students) affect your experience?
9. We are considering offering this course in an interactive, online form during J-terms. Do you think this would be attractive or useful for students?
10. To facilitate updates, we are considering encouraging the publisher to provide the textbook in an e-book form. This would cost about \$20 per copy. If this had been available this semester, would you have used it?
Anything else you would like to say about the course?
